Having missed the acquisition boat, Gilead (GILD; not rated) forks up billions to shore up and diversify its pipeline. Given Gllead's internal issues, management overhaul, the unknowns heading into the FINCH Phase 3 readouts, and the questionable valuation for its last M\&A foray, it is no surprise the team was gun shy from an M\&A perspective. With the \$5.1B R\&D collaboration announced on July 14, 2019, Gilead has done the next best thing and gained access to current and future development stage candidates from Galapagos' pipeline. The $\$ 5.1 \mathrm{~B}$ figure could balloon if the ongoing Phase 3 with GLPG1690 and Phase 2 for GLPG1972 were to hit over the next 12 to 24 months. For Galapagos shareholders, this is a bittersweet moment in the 20 year history of the company, one that brings significant validation for the 600 member organization dedicated to identifying novel targets, but complicated by the 10-year standstill agreement with Gllead, which implies no near-term M\&Adriven gratification. Perhaps it could be argued that Galapagos was never really up for sale and in the event of an M\&A, its core pipeline ex-filgotinib would have to be spun out as a separate entity, akin to the Johnson \& Johnson (JNJ; not rated) \$30B buyout of Actelion in January 26, 2017. However, such a scenario would be untenable for Gilead since gaining access to the Galapagos discovery engine was the key to the transaction, which doubles Gilead's pipeline and represents the first major move by Gilead's new CEO. Importantly, maintaining Galapagos' independence potentially keeps the discovery engine humming with long-term benefits for both companies, in our view. The arrangement with Gilead reflects modifications to the existing filgotinib commercial license, which now provides Galapagos with a broader EU commercial role, inline with Galapagos' long-term strategy of becoming a fully integrated biopharmaceutical company, and should allow for rapid commercialization of future medicines from its pipeline, in our view. Note, there are >40 clinical studies currently being conducted by Galapagos highlighting the versatility and the scope of its discovery engine and the transaction. While we would not be surprised by some churn in the shareholder base, given the scope of the deal and risksharing post Phase 2 for future programs starting with GLPG1972, we are increasing our 12-month target on shares of Galapagos to $\$ 205$ from $\$ 150$. Note, post deal closing we estimate Galapagos pro forma cash at \$109/share.

Key metrics for the 10-year R\&D collaboration. (1) \$3.95B upfront; (2) $\$ 1.1 \mathrm{~B}$ equity investment; (3) Gilead enhances its stake in Galapagos to $22 \%$ with an option to scale to $29.9 \%$; (4) opt-in fees and milestone payments per new target; (5) 50/50 development cost split; (6) royalties in the range of $20 \%$ to $24 \%$ for ex-filgo; (7) restructuring of the filgotinib commercial arrangement to enhance Galapagos' presence in the EU; and (8) Gilead to nominate two members to Galapagos board. Furthermore, Gllead could pay: (1) \$325M for the ex-EU rights to GLPG1690 upon successful Phase 3 and FDA approval while sharing global development costs; (2) \$250M for GLPG1972 should it decide to opt-in post-Phase 2; and (3) \$150M for all other pipeline programs upon decision to opt-in post Phase 2.

Valuation and risks to our investment thesis. Our new 12-month price target on shares of Galapagos is $\$ 205$ vs. our prior $\$ 150$ target and reflects key changes to the structure of filgotinib as well as GLPG1690 and GLPG1972, with no changes to our assumed probability of success for either GLPG1690, currently in Phase 3 or GLPG1972, currently in Phase 2a. Our target is derived from a 13-year DCF-based, sum-of-the-parts analysis. Our DCF is driven by: beta of 1.21 , terminal growth rate of $-3.0 \%$, risk premium of $4.93 \%$, calculated WACC of $8.2 \%$, and tax rate of $20 \%$ beginning in FY 2025. Filgotinib (79\%), GLPG1690 and GLPG1972 (3.5\% each) together make up $86 \%$ of our value, with the remainder derived from the probability-adjusted, filgotinib-associated milestone payments. For filgotinib, we assume POS in the range of: $80 \%$ (upped from $75 \%$ previously) for RA based on the FINCH 1 and 3 clinical updates released post close on March 28, 2019, 65\% for UC, and 60\% for CD, PsA and AS each, whereas for ' 1690 and '1972, we assign a $35 \%$ and $10 \%$ POS, respectively. Note, filgotinib, in our view, did not materially underperform upadacitinib in the FINCH 1 and 3 studies, which we assigned a low probability outcome due to its competitive profile, along with our $\$ 2.9 B$ in 2027 sales estimate for the RA segment. Other key risks include: emergence of safety concerns, clinical risks, regulatory risks, and financial risks. Furthermore, regulatory and commercial strategy for filgotinib is under the control of partner, Gilead, not an established player in autoimmune indications. Hence, Gilead may not be able to drive rapid adoption of filgotinib, especially if the overall profile is relatively undifferentiated from AbbVie's upadacitinib, in our view. Hence, our estimates could be negatively impacted if AbbVie successfully leverages its market positioning with Humira during the launch of upadacitinib, which is likely to be a year ahead of filgotinib. The next two value drivers for Galapagos are GLPG1690 and GLPG1972 programs, both of which are high-risk, high-reward programs given the checkered history of drug development of each target.

Exhibit 1: Weighted Contribution of Individual Disease Segments to Target

H.C. WAINWRIGHT \& CO, LLC RATING SYSTEM: H.C. Wainwright employs a three tier rating system for evaluating both the potential return and risk associated with owning common equity shares of rated firms. The expected return of any given equity is measured on a RELATIVE basis of other companies in the same sector. The price objective is calculated to estimate the potential movements in price that a given equity could reach provided certain targets are met over a defined time horizon. Price objectives are subject to external factors including industry events and market volatility.

## RETURN ASSESSMENT

Market Outperform (Buy): The common stock of the company is expected to outperform a passive index comprised of all the common stock of companies within the same sector.
Market Perform (Neutral): The common stock of the company is expected to mimic the performance of a passive index comprised of all the common stock of companies within the same sector.
Market Underperform (Sell): The common stock of the company is expected to underperform a passive index comprised of all the common stock of companies within the same sector.

Investment Banking Services include, but are not limited to, acting as a manager/co-manager in the underwriting or placement of securities, acting as financial advisor, and/or providing corporate finance or capital markets-related services to a company or one of its affiliates or subsidiaries within the past 12 months.

H.C. Wainwright \& Co, LLC (the "Firm") is a member of FINRA and SIPC and a registered U.S. Broker-Dealer.

I, Debjit Chattopadhyay and Earl DeSouza , certify that 1) all of the views expressed in this report accurately reflect my personal views about any and all subject securities or issuers discussed; and 2) no part of my compensation was, is, or will be directly or indirectly related to the specific recommendation or views expressed in this research report; and 3) neither myself nor any members of my household is an officer, director or advisory board member of these companies.

None of the research analysts or the research analyst's household has a financial interest in the securities of Galapagos NV (including, without limitation, any option, right, warrant, future, long or short position).
As of June 30, 2019 neither the Firm nor its affiliates beneficially own $1 \%$ or more of any class of common equity securities of Galapagos NV.
Neither the research analyst nor the Firm has any material conflict of interest in of which the research analyst knows or has reason to know at the time of publication of this research report.

The research analyst principally responsible for preparation of the report does not receive compensation that is based upon any specific investment banking services or transaction but is compensated based on factors including total revenue and profitability of the Firm, a substantial portion of which is derived from investment banking services.

The Firm or its affiliates did not receive compensation from Galapagos NV for investment banking services within twelve months before, but will seek compensation from the companies mentioned in this report for investment banking services within three months following publication of the research report.

The Firm does not make a market in Galapagos NV as of the date of this research report.
The securities of the company discussed in this report may be unsuitable for investors depending on their specific investment objectives and financial position. Past performance is no guarantee of future results. This report is offered for informational purposes only, and does not constitute an offer or solicitation to buy or sell any securities discussed herein in any jurisdiction where such would be prohibited. This research report is not intended to provide tax advice or to be used to provide tax advice to any person. Electronic versions of H.C. Wainwright \& Co., LLC research reports are made available to all clients simultaneously. No part of this report may be reproduced in any form without the expressed permission of H.C. Wainwright \& Co., LLC. Additional information available upon request.
H.C. Wainwright \& Co., LLC does not provide individually tailored investment advice in research reports. This research report is not intended to provide personal investment advice and it does not take into account the specific investment objectives, financial situation and the particular needs of any specific person. Investors should seek financial advice regarding the appropriateness of investing in financial instruments and implementing investment strategies discussed or recommended in this research report.
H.C. Wainwright \& Co., LLC's and its affiliates' salespeople, traders, and other professionals may provide oral or written market commentary or trading strategies that reflect opinions that are contrary to the opinions expressed in this research report.
H.C. Wainwright \& Co., LLC and its affiliates, officers, directors, and employees, excluding its analysts, will from time to time have long or short positions in, act as principal in, and buy or sell, the securities or derivatives (including options and warrants) thereof of covered companies referred to in this research report.

The information contained herein is based on sources which we believe to be reliable but is not guaranteed by us as being accurate and does not purport to be a complete statement or summary of the available data on the company, industry or security discussed in the report. All opinions and estimates included in this report constitute the analyst's judgment as of the date of this report and are subject to change without notice.
Securities and other financial instruments discussed in this research report: may lose value; are not insured by the Federal Deposit Insurance Corporation; and are subject to investment risks, including possible loss of the principal amount invested.
